SKILLS React, Redux, Express, JavaScript, Flask, Python, SQL, SQLAlchemy, Sqlite3, Git, HTML5, CSS3

PROJECTS

Stickers & Stories (React, Redux, Python, SQLAlchemy, HTML5, and CSS3)

[Live Site](#) | [Github](#)

A full stack ecommerce site where users can buy and sell digital stickers and ebooks.

- Engineered React validation for Google Docs when site users create ebook product listings to ensure product accessibility after checkout
- Controlled flow of review data by combining SQLAlchemy querying and conditional rendering to prevent multiple reviews per product per user
- Integrated WTForms and SQLAlchemy with Flask backend to ensure data entries are created with all necessary requirements and are maintained properly to keep site-to-user relations friendly

Medium Blog (React, Redux, Python, SQLAlchemy, HTML5, and CSS3)

[Live Site](#) | [Github](#)

A full stack application where users can write stories, follow other users, and like their favorite stories and comments.

- Formulated a variable prop thread to allow for login-popup modal reusability which keeps authentication clean and reduced the necessary components from 5 to 1
- Created React functional components to artfully display user stories and dynamically formatted with conditional rendering to fit photos when added by the author
- Coordinated group chats via Slack to utilize GIT to maintain project lifecycle and collaborated with my team to produce a cohesive vision
- Achieved live updating components via React Hooks and state variables to prevent the persistence of outdated data on the frontend during the user experience

SoundCloud Project (Javascript, Express, HTML, CSS)

[Live Site](#) | [Github](#)

A full stack SoundCloud clone where users can add albums and songs for other users to listen to and listen to music from other users.

- Implemented an Express backend to serve user data to the client side of the application effectively when properly authenticated fetch calls are triggered by Redux thunks on the frontend
- Employed HTML audio tags with control argument to produce sound bars with pause-play button to increase user friendliness when clicking on an audio file
- Styled some site features off of SoundCloud formats, such as matching exact hex codes, for authentic feel

EXPERIENCE

Home Depot, Cashier/Customer Service Associate Bloomsburg, PA

May 2018-February 2019

- Facilitated conflict resolution with patience, empathy, and active listening during heated customer disputes
- Exceeded customer service expectations by creating and maintaining professional relationships with both regular tiered and pro account holders
- Conserved company revenue by following protocols for product returns

Central Columbia Elementary, Teaching Assistant Bloomsburg, PA

September 2017-June 2018

- Supervised 20 students at a time daily and 40 students at a time on a weekly basis
- Proofread writing assignments for proper grammar and punctuation
- Graded mathematics assignments for correct solutions and assisted struggling students with achieving passing test scores

EDUCATION

App Academy New York, NY

2023

- Coding bootcamp with <3% acceptance rate that educates its students on programming languages, technologies, soft skills, and the mindsets needed to excel in the modern day workforce

Central Columbia High School Bloomsburg, PA

2014-2018

- Graduated 2nd in my class with a 4.0 GPA
